INFINITT Broker PBMHL7 HL7 Conformance Statement

Revision 1.2

0. Introduction

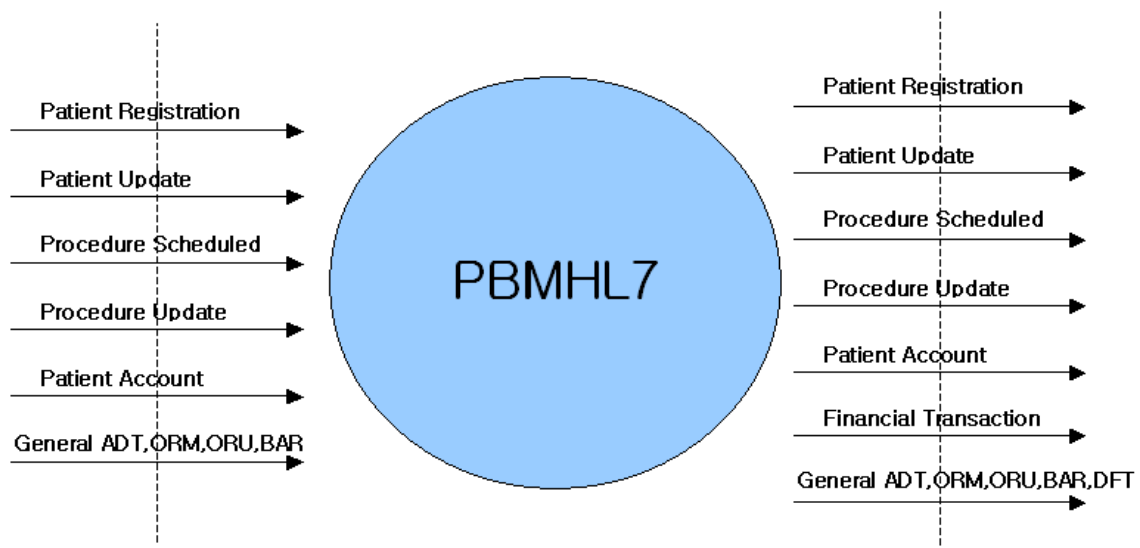

This conformance statement (CS) specifies the compliance of PBMHL7 to HL7. It details the HL7 and the messages that are supported by this product.

PBMHL7 is a PBMHL7 for INFINITT Server running on Microsoft Windows NT/2000. It uses HL7 Messages to inbound from HIS or RIS.

1. Implementation Model

1.1 Application Data Flow Diagram

The following figure shows that PBMHL7 can receive and process ADT, ORM, ORU, and BAR messages and send ADT, ORM, ORU, BAR, and DFT specified in HL7.

1.2 Fundamental Definitions of Message

PBMHL7 can support HL7 Version 2.3.x and 2.4 and inbound all HL7 messages to interface

between HIS and PACS and same as outbound.

1.3 Sequencing of Real-World Activities

Not Applicable
